

PD78XG/ PD70XG (UL913)

Intrinsically Safe Full Power Digital Radio

- UL/CSA/CQST Certified explosion-proof DMR Portable Two-way Radio
- Designed for Hazardous Working Environments
- Smooth Migration from Analog to Digital
- Larger Battery Capacity, Longer Cycle Life

PD78XG/PD78X PD70XG/PD70X (UL913)

As digital two way radio built to the DMR standard, PD78X/PD78XG/PD70X/PD70XG (UL913) are specially designed for those who work in environments with explosive gas and combustible dusts, where using regular radios could be unsafe. Hytera understands the challenges of professionals in hazardous environments. Dedicated to designing and delivering of intrinsically safe and reliable communications solutions, Hytera launched PD78X/PD78XG/PD70X/PD70XG (UL913), portable explosion-proof DMR radio with ergonomic and rugged design, easy to use, long battery life and UL913-rated for safety. The PD78XG/PD70XG enable your workers communicate safely and efficiently wherever it must be.

Applications

Oil & Gas, Refinery, Chemical Industry, Fire Fighting

PD78X,PD78XG,PD70X,PD70XG in this document are intrinsically safe, they are different from the conventional types.

Highlights

UL913 and CSA Certificated Explosion-proof Safety

Hytera PD78XG/PD70XG intrinsic safety radio is designed upon the requirements of USA UL913 and Canada CSA standard, the radio works safely in most hazardous environments with explosive gas and dust particles.

Reliable Quality

PD78XG/PD70XG is strictly compliant with MIL-STD-810 C/D/E/F/G and IP67 standards, ensuring outstanding performance even in harsh environments.

Support MPT and DMR Trunking Modes

Upgrade software enables new features without buying a new radio could also be switched into MPT and DMR trunking modes with corresponding license applied in the same hardware.

High Audio Quality and Assured Communication

Based on DMR Technology

Benefitted from the latest digital DMR technology, PD78XG/PD70XG ensure your workers talk and hear clearly over excessive noise.

Ease To Use

With large PTT, volume, channel knobs and programmable buttons, PD78XG/PD70XG are easy to operate even when wearing gloves. The PD78XG/PD70XG with large and colour display (PD78XG only) and bright LED show status information at a glance.

Larger Li-Ion Battery capacity, longer cycle life

Equipped with 2400mAh and UL913/CSA certificated Li-Ion battery, PD78XG/PD70XG provides with shift life of 18 hours under 5-5-90 duty cycle. And the battery life-span is longer as the charge/discharge cycles reduced.

Features

• Higher Spectrum Efficiency, Higher Channel Capacity

Benefiting from the TDMA technology, PD78XG/PD70XG allows twice the channels based on the same spectrum resource. This is a big help to relieve the stress of increasing shortage in spectrum resource.

• Dual Modes (Analog + Digital)

PD78XG/PD70XG can operate in either analog or digital mode. It is compatible with the prevalent analog system, ensuring a smooth analog-to-digital transition.

• Dual-slot Pseudo Trunk

With this feature, the free slot can be allocated to a member that needs to communicate, effectively enhancing frequency efficiency and allowing you to communicate timely under emergency situations.

Slot 1, Slot 2 are automatically assigned to voice call 1 or voice call 2.

• Secure Communication

Besides the basic encryption of the digital technology, PD78XG/PD70XG provides enhanced encryption capability (such as 40,128, 256-bit encryption algorithm) and the Scrambler feature (selectable).

• Data Services

PD78XG/PD70XG supports data capabilities of sending Private, Group text message. It also supports Third Party to control the radio via Third party API (GPS, Radio Registration Services, Radio and Call Control, Telemetry*, Data Transfer*), via Telemetry control to radio.

• Various Analog Signaling Types

PD78XG/PD70XG supports various analog signaling types (HDC1200, DTMF, 2-Tone and 5-Tone), various squelch control types (CTCSS/CDCSS), thus providing higher function expansion capacity to the analog world.

- **Supplementary Services**

PD78XG/70XG supports supplementary services of Radio Check, Remote Monitor, Call Alert, Radio Enable and Radio Disable.

- **Enhanced Safety**

Hytera PD78XG/PD70XG provides a dedicated emergency button. In case of any accident, a press on the button will trigger an alarm and initiate a voice call to a pre-programmed work fellow or group. Built-in Man-down, GPS and Lone Worker functions are also available with the digital portable.

- **Versatile Services**

In addition to conventional communication services, PD78XG/PD70XG features rich data services and selectable functions such as Text Message, Scan, Emergency, Man Down (optional), Auto Registration, High-speed Data Transmission and Lone Worker.

Digital Technology

1 Higher Spectrum Efficiency

Mandate by FCC that non frequency efficient ($\geq 12.5\text{kHz}$) equipment will not be approved after 2011 due to congestion. And all public safety equipments have to be migrated by 2013. High channel efficient technology is the trend of world to replace analog technology

2 Longer Battery Life

Two-slot TDMA, however, offers a good way forward. Since an individual call uses only one of the two timeslots, it requires only half of the transmitter's capacity. 40% Battery Life Improvement with TDMA.

3 Better Digital Audio Quality

With the combined application of narrowband codec and digital error-correction technologies, PD78XG/PD70XG is capable of ensuring you superior voice in noisy environments or at the edge of the coverage area. In addition, the adoption of the AGC technology also optimizes your voice.

4 Compatible to Analog System

DMR can operate in either analog or digital mode. Accordingly, you can get rid of worries about its compatibility with the analog system that you are using, and just enjoy the benefits it brings. DMR allows migration to take place one radio at a time, one channel at a time or the entire system at a time.

5 Save Equipment Cost

Compared with FDMA solution, 2 slot TDMA solution allows 2 simultaneous calls through 1 repeater, which helps reduce minimum entry cost.

6 End-to-End Encryption

Voice or data information is encrypted during the transmission from end to end. The encrypted information can only be decode by the terminals who has the specific key.
